WORK HISTORY

July 2021 - Current
Software Engineer *LINQ EMS*, Wilmington, NC
Technologies: Spring Boot and Angular
- Responsible for updating and maintaining Restful API using Spring Boot
- Consistently completing sprintwork and delivering unit-tested systems with a minimum of 90 percent code coverage and less than 5% regression

September 2020 - July 2021
Software Developer *Troy Web Consulting*
Stack: Flutter, Angular, React, Laravel, Firebase, AWS
- Built user-logging and employee check-in Covid app for in-house use for both Android and iOS

December 2019 - July 2021
Software Developer *Atlantic Pacific Management*
Stack: JQuery, Spring Boot, AWS, Angular
- Setup pipelines to automate CI/CD of the Spring Boot Restful API with AWS CodePipeline
- Used Spring Boot to build out a secure Restful API with JWT for the Ionic Hybrid mobile apps to consume
- Built a maintenance app, AceApp, from start to finish for web, Android, and iOS within a 6 month timeframe, used by 80+ maintenance engineers

May 2020 - December 2020
Software Developer *Pinecrest Police Department*
Stack: Java, Spring Boot, Typescript, Angular, SQL Server
- Used Spring Security to properly implement Roles and Privileges, governing different access levels for lieutenants, sergeants, and dispatchers
- Created user logging system. Upgraded image uploading feature to handle many images at once. Improved BOLO UI/UX application-wide by making it more user-intuitive as well as following UI best practices.

June 2017 - June 2018
Mobile Application Developer *Cube USA*
Stack: .NET, Angular Native, SQL Server
• Developed cross-platform mobile application from start to finish and successfully deployed iPhone and Android app under a tight 6 month deadline
